HERTY GERTY TUBULAR KEY MACHINE

AIHG-1

731⁵⁰

Duplicate tubular keys without having to make a large investment. Extremely easy to operate: Decode the original key with the supplied decoder and place the blank on the index hub. Dial the desired cut-depth, turn the hand crank, and you've made your tubular key. In just seconds, this extraordinary equipment will cut #137 tubular keys — Ace standard, small (137S), large (137A, UL), offset right and left; in addition to Gem, Taylor, and others with spacing anywhere from 0° to 360°
Supplied complete with decoder, special high speed steel cutters and complete instructions in a convenient wooden case.

EJECTOR PUNCHES

Two tools for ejecting IC cores.

TBIP - Originally designed for use with THE BLOCK, this punch is suitable for most any I/C core.

TBMP - Use this time saving 4 pronged punch to eject cores. Suitable for manual use and with A-1's service equipment. Ejects cores with two hits instead of 6 or 7.

- AI40A** Accessory Top **85.00**
- AI40B** Accessory Kit for .140 spacing **151.00**

PLUG SPINNER

AI26
69⁹⁰

This tool is a must when it's easier to pick a lock backwards instead of in the right direction. With the lock picked in the direction, simply wind the spinner in the proper direction, set the trigger, insert the blade into the plug and then release the trigger. The plug is now picked in the right direction.

THE BLOCK

An interchangeable core hold fixture, designed to service Best/Falcon type systems with a maximum of seven pins. Compact and rugged mechanism for getting foolproof answers when looking for control-key codes. It's easy-to-use; just drive the pin stacks into the Block where the pin tray area keeps them separated. Works better than shimmying or hand disassembly because, when opened, all pin stacks are accessible yet secure. Made of anodized aircraft alloy.

AITB1
170⁰⁰

CAPPING BLOCK

AITB2
180⁰⁰

Designed to save you space, time and money, TB2 is more than just a capping block. It is a versatile and compact workstation for interchangeable cores that's lie having two capping blocks in one unit. Made with hard anodized aircraft alloy and heat-treated steel, it comes with two different tops which allows it to cap Best, Eagle, Arrow and Falcon cores.

DUMPING BLOCK

AITB3
110⁰⁰

Dumps and holds pins and springs from dozens of cores made by Best, Eagle, Arrow and Falcon. Using the standard ejector pin (included), simply drive the pin stacks into the lower compartment until they are ready to be disposed. Hardcoat anodized aluminum construction.

DUO BLOCK

Can be used for both .140 and .150 spacing. Ideal for capping Best® type cylinders and KABA Peaks®. Caps both standard and spring (slide covered) I/cores.

AITB4
145⁰⁰

MORTISE CYLINDER FORCE TOOL

Applies over 150 ft. lbs of torque to overcome set screws on most mortise cylinders. Designed to defeat any mortise lock, including shrouded and internally staked locks. Uses standard drill bit and wrench.

AI61 139.00

FEATHER TOUCH TENSION WRENCH

Light turning pressure. Automatically adjusts to the proper tension.

AI11 37⁹⁰

A1 MAGNUM PICK GUN

Features easy tension adjustment. Three tips and a tension wrench are included. The pick gun can be easily disassembled for maintenance.

AI44 51⁵⁰ AI44-REPL Replacement picks 9.50

BROKEN KEY PULLERS - SET OF 3

Designed to be the most effective extractors available today. Made of top American steel, the blades are locked in steel and fitted with a comfortable handle. Include three extractor types; .040 spiral, saw tooth, and hook.

INCLUDES A 5-YEAR WARRANTY

Code	Description	Price
AI27	1 ea spiral saw tooth, hook	33.00
AI27-SP	3 spirals	33.00

8⁵⁰

CAPSAVER™ PRESS FOR INTERCHANGEABLE CORE

The most time consuming task of capping cores is placing the small caps onto each chamber of the core. With the CapSaver™ Press, A-1's exclusive CapSaver™ strips will replace traditional caps. The CapSaver™ press actually punches and forms the caps as it seats them into the core.

Users will realize a considerable amount of direct savings in both time and materials. Actual tests demonstrate that 30 seconds is saved just in the time spent loading the 6 or 7 caps before staking them.

Each CapSaver™ strip is designed to cap four 6 or 7 pin cores and costs users about half as much as the caps produced by a leading manufacturer (suggested dealer price).

AICAP-5	CapSaver™ Press for I/Core	1395.00
AICS-50	CapSaver™ Strips - 50 count	51.00
AICS-250	CapSaver™ Strips - 250 count	231.90
